

A project about young adults with intellectual/developmental disabilities and belonging

Do you work or volunteer supporting young adults (between 18 and 35 years old) with intellectual and developmental disabilities?

Do you want to share your professional perspectives about how young adults with intellectual and developmental disabilities come to experience belonging?

- Do you work in the Greater Toronto Area (GTA)?
- Are you willing to do one audio recorded interview?

If you said yes to all of these, you could get involved in a research project!
